The thrill of the grill ...

JON ROGERS/Mustang Daily

Ken McConnell, an industrial technology junior, cooks steak sandwiches to raise money for the Polo Club at last weekend's Poly Agri View. The club raised about \$300 during the two-day event. See tomorrow's follow-up story.

Election generates higher voter turnout, Kapic-Taylor runoff

This year's ASI elections resulted in a runoff for ASI president and an increase in voters.

In the presidential race, ASI executive staff member Dave Kapic and incumbent Adam Taylor nearly tied, each with approximately 39 percent of the vote. They face off again Wednesday.

Kapic received 1,915 votes. Taylor had 1,900. Business Administration senior Kim Forrester received 1,064 votes.

Agribusiness junior Dennis Albani beat out political science junior Renée Jensen in the race for chairman of the board with nearly 60 percent of the vote.

Students overwhelmingly passed both ballot resolutions. In short, one resolution bans smoking in faculty offices at all times and the other allows for future bylaw changes to be made by either the student body or the board of directors.

ASI tallies show that 4,879 people voted in the election, roughly 30 percent of the campus' eligible voters. ASI officials estimated a total of 4,100 people voted last year, about 25 percent of the campus' eligible voters.

Professor tries to revive the Poly good ol' days with beanie decals

By Tracy Condon
Staff Writer

Imagine this. It's 1948 and you're a freshman entering Cal Poly, an all-male college. The average age of a freshman student is 26, because World War II has ended and the veterans are now going to college. Having just endured a bloody war, Cal Poly's student body pulls together to recover from a worldwide crisis.

This is how it was when Cal Poly animal science professor Wallace Glidden first attended Cal Poly.

Cal Poly has changed a lot since then, especially with the addition of women to the student body. Glidden, however, wants to bring back some of the "old Cal Poly."

"I don't want the students to lose some of the traditions we had," Glidden said. "Poly is going through changes. We have to hang on to some of our roots."

One of the traditions Glidden wants to bring back has to do with a certain decal which pictured Cal Poly's mascot, the mus-

tang, wearing a beanie.

Glidden said this decal was seen on notebooks, cars, trucks and dorm windows.

The significance of the tradition was that incoming freshmen, for the first two weeks of school, had to wear a beanie. After two weeks, the freshmen had to compete against the sophomores in the "Olympic Games," held at the stadium.

If the sophomores defeated

the freshmen, the freshmen had to wear the beanies for another two weeks. If the freshmen won, though, they could stop wearing the beanies.

"We wanted to get away from the agony of war," Glidden said. "Men who had seen the bloodiest of war felt these traditions were important."

Glidden suggested that this year's freshmen consider doing this to next year's freshmen.

When Glidden returned to Cal Poly as a professor in 1961, he noticed the decal was no where to be found. Even he had not saved one of the decals.

He searched all over for the decal and contacted alumni. Finally, he received a phone call from a Cal Poly graduate who had one original decal.

Glidden got the decal and has since reproduced it.

"I didn't want to see us lose something," Glidden said. "I wanted to bring it back. The heritage will always be here."

According to Glidden it was

Health fair in Chumash kicks off Women's Week

■ Various groups will discuss the mentally ill, nutrition, ethnic issues and self-defense.

By Anne McMahon
Staff Writer

How would you define your "health and wholeness?"

Cal Poly's 10th annual Women's Week starts today with the theme "Women's Health and Wholeness: Whose Prescription Is It?", and the participants at today's Health Provider's Fair are here to help you write your own prescription for physical, emotional, social and financial health and wholeness.

Representatives from an eclectic group of agencies will be in Chumash Auditorium for the fair from 9 a.m. to 3 p.m.

This is the first time that health has been the central theme of Women's Week, so the Health Provider's Fair is something new.

Roxana Lopez, an administrative operations analyst

at Cal Poly's Cooperative Education and Placement Services, is the event coordinator. She said all the participating organizations are local non-profit agencies.

"We decided not to try to limit it to only (physical) health-related groups," said Lopez, "because it is pretty subjective as to what health actually is."

Lopez is a board member of Casa Solana, a residential program for women addicted to alcohol or other drugs, which will be represented at the fair.

She said, "I know how important it is for them (nonprofit organizations) to find free ways to get their message out to the public."

More than 60 organizations were invited to participate, but because most are run by a limited number of volunteers and/or paid staff, only 20

LETTERS TO THE EDITOR

Poly needs good grad speaker

For five long years we have struggled to attain an educational milestone, brought to fruition by the spring commencement ceremonies. The excitement caused by the proximity of the realization of our endeavors was brought to an abrupt halt upon discovering who the speaker at the ceremonies is scheduled to be.

Of the many possible candidates available for the honor of speaking at the morning ceremonies, we are distraught with the decision made by the commencement committee. While it is obvious the gentleman chosen has outstanding credentials, we find his qualifications lacking and insufficient to justify him addressing our commencement audience comprised of those from the fields of agriculture, engineering and science and mathematics.

Many of our parents have sacrificed a great deal to put their sons and daughters through school. These people will be traveling at one of the major events of our lives. After all the sacrifices these parents have made, do they deserve to be subjected to the selection which has been made? What this man has done is to be commended, but it hardly relates to either the background or the future of the majority of the graduates participating in the morning ceremonies.

Many of our peer institu-

tions' graduation ceremonies are being commenced by Fortune 500 C.E.O.'s, successful politicians and many other nationally prominent members of our society. We and our parents, however, will be subjected to a speaker whose message will be inappropriate and impertinent.

WE CUT IT... WE CUT IT NOT...
WE CUT IT...

Academic Affairs shares some short-term decisions

By R.D. Koob

Anyone reading the newspaper must be aware by now that the financial outlook for next year is rather grim. The final outcome is still very uncertain because more of the significant legislative processes are yet to be completed. At present, all we have available for guidance is the governor's budget and the Board of Trustees' response. Taken together they send the message back to Cal Poly that we could lose as many as 100-plus faculty positions plus an even larger number of administrative and staff positions. This reduction includes some 70-plus administrative and staff positions already sacrificed to budget shortfalls in the past three years which now must be institutionalized.

Because the final budget numbers will not be known until the middle of June at the earliest, it is difficult to say now exactly what steps will be taken to accommodate the shortfall. Nonetheless, prudent management requires that Cal Poly plan for some target numbers with an appropriate error band around that target.

To do this wisely, it is necessary to gain as much information as possible about the university. No ad hoc process will yield the kind of in-depth information available from a well-planned and well-executed assessment program. But even limited assessment, if done accurately, is better than none.

For purposes of this discussion a program is any organized activity which uses resources budgeted to Academic Affairs. In addition to instructional programs in the departments, this includes professional development programs such as sabbatical leaves, special student programs such as the campus farm and athletics, and instructional support activities such as the library and enrollment support services.

To provide as much information as possible about our current program structure, an all-faculty task force has been formed to assess our current academic program array. Seven of the 14 members compromising this task force were selected by the Academic Senate Executive Committee and seven faculty members were ap-

pointed by President Baker. These people bring together expertise gained by serving on a variety of campus committees including Academic Planning, Senate Long Range Planning, Senate Curriculum and Senate Budget committees. The task force will utilize criteria developed by the Senate Long Range Planning Committee.

The criteria calls for a comprehensive program review, something clearly beyond the realm of possibility with the short time at our disposal. Thus, the task force will use information currently available in the university data bases that illuminate the criteria. Extracts of this data will be returned to the departments and other units for verification and comment. Based on this coarse screen, programs will be selected for more careful review. Ultimately, some programs will be placed in an "at risk" category.

The recommendations of the task force will be considered advisory to the Academic Senate for academic actions and the president for resource allocation actions.

Budget decisions ultimately must be made by the president. Prior to making any decisions, the president will consult with, at minimum, the president's Advisory Committee on Budget and Resource Allocation. Recommendations from the Academic Deans' council relayed to the president via the vice president for academic affairs are also likely to be seriously considered by the president.

What happens if a decision is made to reduce or discontinue the funding to a given instructional program? My next letter will focus on the process and possible consequences of such a decision.

If you would like to ask questions about this or any other budget-related issue, please make your e-mail inquiry to "Budget at Cal Poly."

I will add your e-mail address to a mail list and provides copies to you on questions and answers from others as well.

R.D. Koob is the vice president of academic affairs. This is the second in a series about budget decisions.

WORLD

Marines start building 'safe-haven' for Kurds

SILOPI, Turkey (AP) — U.S. Marines on Sunday began building the first safe-haven settlement for Kurdish refugees in northern Iraq, despite more bitter denunciations from Iraq.

As Marines moved into the area of Zakho, Saddam Hussein's troops withdrew as agreed, some even offering smiles and waves to the arriving Americans.

But the Marines were surprised to find 200 Iraqi police in the city. The police pulled out as well, but some U.S. officials objected that they had been sent to Zakho at all.

"We are very concerned about this new development, the introduction of police forces, which we think is contrary to the spirit of our agreement," said Lt. Col. Bob Flocke, a U.S. military spokesman.

Church roof collapses during concert, kills 7

POMPIGNAN, France (AP) — The roofing on the nave of a church collapsed during a classical music concert, killing seven people, including two girls and the mayor of this southwestern village, officials said Sunday.

Thirteen people were injured in the accident Saturday night, officials said.

"It started with cracking sounds. People thought of an air current or a badly closed door," said Assistant Mayor Antonin Faucani, one of about 60 people who attended the violin and piano concert.

The noise then increased and "sounded like an explosion," he said. "There were loud cries. I turned the lights on. And the sight was before me."

NATION

City council skeptical of selling police guns

DETROIT (AP) — The police want to have a better chance against well-armed criminals, but their plan to pay for more powerful weapons by selling off the old ones has raised concerns about where their aging arsenal could end up.

The police last week asked City Council for permission to sell 8,482 old guns and 1,500 holsters to a wholesaler for more than \$600,000. The wholesaler would then resell most of them to licensed retail firearms dealers outside Michigan.

The nine-member council, without taking a vote, refused initially to approve the request, saying it wanted more time to discuss it.

Schwarzkopf returns, gets hero's welcome

MACDILL AIR FORCE BASE, Fla. (AP) — Gen. H. Norman Schwarzkopf returned to a hero's welcome Sunday, taking his family in a bear hug and telling a cheering crowd, "It's great to be home."

As he stepped off the plane at MacDill Air Force Base, the victorious U.S. commander saluted, then with a broad smile embraced his wife, Brenda, and their three children. His black Labrador, "Bear," bounded into his arms.

"I can't describe to you the emotions in all of our hearts," Schwarzkopf said after making his way through a crowd of 500 well-wishers. "It's great to be an American."

The turnout was smaller than expected after officials spent several days encouraging people to stay home and avoid a crush.

STATE

Private plane crashes near Santa Barbara

SANTA BARBARA, Calif. (AP) — A private plane crashed in a remote area of the Los Padres National Forest, killing at least three people, authorities said Sunday.

Rescuers on Sunday spotted the wreckage of the Piper Cherokee in the mountainous area about 35 miles southeast of Santa Barbara, said Tim Gracey, spokesman for the Santa Barbara County Sheriff's Department.

Rescuers confirmed that three people were killed. It was not immediately known if a fourth person was on board the four-seat plane, Gracey said.

Four people were on the plane when it took off Saturday morning from Van Nuys Airport for Santa Barbara, said Ed Matthews, senior flight instructor for Westwind Aviation, the plane's owner.

Lecturer on leave for saying he has drugs

STANFORD, Calif. (AP) — For lecturer Stuart Reges, saying he carries illegal drugs in his backpack on the Stanford University campus and advised a student it was safe to try one is a matter of free speech.

But for administrators, Reges' statements could be an intentional violation of policy that could cost Stanford all its federal funding.

Stanford, after receiving a warning from federal drug czar Bob Martinez, has placed the award-winning computer science lecturer on paid leave and has started an investigation.

Reges, who proclaimed his views to federal officials, said he was "somewhat stunned" by the turn of events.

Writing a better prescription for women's health

By Donna Lynn Darmody
Special to the Daily

It begins today. Women's Week 1991. A full week of workshops and presentations devoted specifically to the physical and emotional health of women. The theme: Women's Health and Wholeness: Whose Prescription?

One may ask, "Why focus on women's health? Why not health in general? What's so different about men and women's health?"

It's quite clear that certain conditions are unique to women (breast cancer, dysmenorrhea, caesarean section) or are more prevalent (lupus, osteoporosis, eating disorders). And, there are concerns specific to women in regards to health treatment. For example, 70 percent of all psychoactive drugs (tranquilizers, antidepressants) are prescribed to women. More women than men do seek treatment for psychological issues.

ELECTIONS

From page 1

The election also determined 24 directors.

Elected from Engineering: electronic engineering sophomore Gus Gonzalez, electronic engineering sophomore Phil Eugenio, industrial engineering senior Geoff

Austin and computer engineering junior Mark Peters.

Elected from Liberal Arts: journalism junior Kelly Gregor, political science sophomore Brent Hultquist and political science junior Kurt Schwabe.

Elected from Business: business sophomore Jennifer Felder,

economics senior Dennis Lang and business freshman Brent Drouin, a write-in candidate.

Elected from Science and Math: biology junior Paul Sahar-gun.

Elected from Architecture and Environmental Design: city and regional planning junior Julie

Reader, landscape architecture junior Mike McIntyre and architecture junior Marlie Bartolome.

Elected from Professional Studies: industrial technology junior Pamela Powers, industrial technology senior Tony Martin-dale and graphic communication

junior Deven Lindemann.

Elected from Agriculture: agribusiness sophomore Deirdre Flynn, agribusiness junior Shaun Neal, agribusiness freshman Todd Fernandes, agribusiness senior Noel Rosa and animal science sophomore Dan Nail, a write-in candidate.

HEALTH

From page 3

cal disorders, but there exists the prevalent stereotype that women's health complaints are more emotionally laden and psychosomatic than men's. Two thirds of all surgical procedures are performed on women — obstetric and gynecological surgery being the most prevalent. In fact, 1,700 hysterectomies are performed daily. Often, the health and psychological risks of these surgeries far outweigh the medical benefits.

In the area of reproduction and birth control, women are exposed to numerous technologies.

Ironically, in other areas of medical practice they receive fewer technological interventions. This is due, in part, to the fact that white men continue to be, almost exclusively, studied in major health care and pharmacological research. This blatant neglect of women caused the National Institute of Health to establish policies for their inclusion in study populations. After three years, the U.S. General Accounting Office (1990) recently reported that this policy has not yet been adequately implemented.

The explanations for dismissal of female subjects are worth

noting. First, their normal hormonal fluctuations are seen as potentially contaminating research results. Another reason is to avoid possible harm to women of childbearing age. While the latter reason is somewhat honorable, there are groups of women at no risk of becoming pregnant (lesbians, women with hysterectomies, monogamous women with partners who have had vasectomies and celibate women). Finally, the expense of increasing sample size to include women is the single factor for excluding them.

The consequence of all this is that we do not know whether

many of the accepted research results and medical recommendations, such as an aspirin a day to protect against coronary heart disease, can be extended reliably to women.

Research must begin to include women as subjects. Also, research on health concerns that uniquely or disproportionately affect women needs to receive increased attention and funding.

Funding is a cost-benefit issue and, in the past, a devaluation of women's health research has existed. What have not been given a fair share of research funding are those physical disorders that affect women, such as rheumatoid arthritis or menstrual dysfunction.

Not only slighted by medical research, women are also more likely to have inadequate access to quality health care. This, in large part, is because women are more likely than men to be poor and hold lower status jobs without benefits. While we are now accepting record numbers of

women into medical schools, women are still under-represented in higher status health care professions, and sex bias still persists.

So, with all this in mind, one can find the answer to "Why focus on women's health during Women's Week?" The response is "It's about time!" It seems the prescription for women's health and wholeness has been written by someone other than ourselves. Women's Week 1991 is a first step in "righting" our own prescription.

Information for this article was compiled from the article "Women's Health, Review and Research Agenda as We Approach the 21st Century," *American Psychologist* (September 1990).

Donna Darmody is the health educator at the Health Center. She is not a feminist but a woman interested in the advancement of health for everyone.

Softball doubles up on Chapman, climbs atop CCAA standings

By Rob Brockmeyer
Staff Writer

The Cal Poly softball team upset second-ranked Chapman College in two games over the weekend and moved into first place in the California Collegiate Athletic Association.

They edged out the Panthers 3-2 in the first game of Saturday's twinbill and finished the sweep with a 1-0 victory in the second game.

"We played with a lot of intensity and desire today and came up with a pair of big wins," said Mustang Head Coach Lisa Boyer. "It's especially nice beating a top team like Chapman to take over the conference lead."

With the sweep the 11th-ranked Mustangs are 26-14 overall and 6-6 in CCAA games.

In the doubleheader's first game, Cal Poly got some timely hitting from Cheryl Lutes and Julie Grennan. Lutes led off the fourth inning with a liner down the first base line for a single. She was sacrificed to second by

Steffanie Adams and came home on a Grennan single to center. The junior from Santa Maria later scored on Kim Schott's grounder.

The Panthers tied the game in the sixth inning, but Cal Poly outfielder Kim Farnam knocked in the winning run in the last of the seventh. Kelly McInerney singled with one out and was advanced to third by Kim Schott's single. Farnam then stepped up and cracked the game-winning hit over the second baseman's head.

Laura Fawcett, coming off a shutout victory against Cal State Bakersfield on Wednesday, got the win as she continued to mow down conference opponents. Reliever Lisa Johnson came in to get the final out in the seventh.

Julie Rome continued Poly's pitching dominance when she tossed a one-hit shutout in the second game. She was on her way to a perfect game until she surrendered a lead-off single in the fifth inning. The sophomore sensation walked only one and

JON ROGERS/Mustang Daily

Cal Poly's Kim Schott singled in the seventh in Saturday's first game, setting up the game-winning hit.

struck out five Panthers.

"I was pleased with the performance of everyone," Boyer said. "It was a great team effort."

With only four conference games remaining, the Mustangs are a sure bet to make

postseason play. Teams have to be in the nation's top 16 in order to qualify for the playoffs.

"We're in pretty good shape at this point in the season," Boyer said. "All we have to do is continue to play consistent ball

and not look too far ahead."

The Panthers will try to get even on April 27 when Cal Poly travels to Orange County for two games. The Mustangs then will go to Bakersfield for a pair of games the following day.

Lady netters better Golden Eagles, 6-3

By Geoff Seratti
Staff Writer

The Cal Poly Women's tennis team finished conference play with only one loss when it beat Cal State Los Angeles at home on Friday.

The Mustangs won five out of six singles matches, beating the Golden Eagles, 6-3, to improve their record to 7-1 in the California Collegiate Athletic Association.

The Mustangs lost two out of three doubles matches as Coach Kevin Platt tinkered with new doubles combinations. Erin Green and Julie Ciancio provided the only doubles win for the Mustangs as they defeated Jennifer Leung and Tracy Fabian 6-2, 7-6 (7-3).

Ciancio had a rougher time at No. 6 singles, losing to Anne Kellogg 6-2, 6-7 (7-4), 6-4. Platt said Ciancio was down 5-2 in the second set but came back to take a 6-5 lead and won the set in the tiebreaker. Platt said Kellogg started attacking more in the second set and Ciancio became tentative, missing balls she wouldn't normally miss.

Overall Los Angeles is a pretty good team, Platt said. Platt tried different combinations at No. 1 and No. 3 doubles. "We're still searching for the right combinations. I don't know what combinations we're going to use yet," he said.

The doubles scores were: No. 1 Vicki Kanter-Alison Lean of Cal Poly lost to Melinda Phillips-Kellogg 6-4, 4-6, 6-0; the Mustangs' No. 2 team of Debbie and Tracy Matano lost to Veronica Pasley-Katie Wood 6-4, 6-4.

Cal Poly swept the first five singles matches: No. 1 Kanter defeated Pasley 7-6 (7-4), 6-3; No. 2 Debbie Matano over Phil-

lips 6-3, 6-2; No. 3 Green defeated Wood handily 6-0, 6-0; No. 4 Tracy Matano beat Leung 6-4, 6-0 and No. 5 Lean put away Ana Jose 6-1, 6-0.

The Mustangs played two other non-conference matches, defeating Sacramento State, 9-0, at home on Saturday and losing to Division I UC Santa Barbara, 7-2, on Thursday in Santa Barbara.

The Gauchos are the top team in the Big West conference, and Platt said some players got a little nervous and started missing some balls. Even though Santa Barbara defeated Cal Poly, the Mustangs had some chances to make it a lot closer, Platt said.

The singles scores were: No. 1 Kanter lost to Laura Rutledge 6-1, 6-4; No. 2 Debbie Matano lost to Debbie Goldberger 6-1, 7-6 (10-8); No. 3 Green lost to Carla Quaresma 6-3, 7-6 (7-5); No. 4 Tracy Matano defeated Trina Eggers 4-6, 7-6 (7-3), 6-1; No. 5 Lean lost to Lisa Layton 6-2, 6-2; and No. 6 Ciancio came through to top Angee Morriss 3-6, 6-4, 6-1.

The Gauchos swept the doubles matches: No. 1 Kanter-Green lost to Goldberger-Morriss 6-2, 6-4; at No. 2 the Matano sisters lost to Quaresma-Rutledge 6-1, 6-2; and the No. 3 team of Lean Ciancio lost by a 6-4, 1-6, 6-3 score to Eggers-Audrey Petermann.

The No. 1 ranked Mustangs ended the regular season in fine fashion at home, routing Sacramento State 9-0 on Saturday to improve their overall record to 15-3. Sacramento State, ranked No. 7 in Division II, fell to 9-7. Senior Debbie Matano had a tough match at No. 2 singles before pulling out a three-set victory over Michelle

Men's tennis topples CSLA 8-1, remains perfect in league play

By Geoff Seratti
Staff Writer

The Cal Poly men's tennis team improved to 9-0 in conference matches with a 8-1 win over Cal State Los Angeles at home on Friday.

Cal Poly, ranked No. 2 in NCAA Division II, improved to 13-8 overall with the win. The only blemish for the Mustangs

was No. 1 Eric Sasao's three-set loss to Sam Lizzul 6-4, 3-6, 6-4.

Mustang Head Coach Kevin Platt said Sasao has been struggling all year. Sasao is ranked No. 2 in the individual Division II national rankings. He has lost three matches in conference play this year including two to Cal Poly Pomona.

"We're in a tough conference to play in, and everybody wants

to do well against Sasao," Platt said. Every player against Sasao is totally motivated, and all his losses have been to good players, he said.

Platt said Lizzul has a big serve and attacks well, making it hard to break his serve.

The Mustangs swept all the other matches in straight sets. In singles, No. 2 Alex Havrilenko

Baseball splits weekend games, falls further back in CCAA race

By Rob Brockmeyer
Staff Writer

As the regular season winds down and every game becomes increasingly vital, Cal Poly had to settle for a split in two games against Cal State Los Angeles over the weekend.

The Golden Eagles won Friday's game 2-1, while the Mustangs took Saturday's, 9-2. With the split, Cal Poly slipped into fourth place and is 10-9 in California Collegiate Athletic Association play and 17-18 overall. Cal State Dominguez Hills took the conference lead by beating Cal Poly Pomona 11-4 on Friday.

The Mustangs failed to pick up ground on the conference-leader and have lost five of their last seven games.

In the series' first game, Cal State Los Angeles snapped a five-game losing streak behind the masterful pitching of Shane Borowski. He retired 16 straight batters after the fourth inning and fanned nine, including six straight late in the game. The only run the Mustangs could get across was in the third inning when Matt Drake hit a grounder to second baseman Larry Huff, whose errant throw to first enabled Sal Cardinale to score

Mustang pitcher Jon Ifland gave up just one earned run and struck out seven in winning his fifth game of the season.

Women's track shines at Mt. SAC relays

BASEBALL

■ Kristina Hand breaks her personal best to win the 3,000 in 9:30.80. Melanie Hiatt places second.

From page 5
from third base.

By Peter Hartlaub
Staff Writer

The majority of the Cal Poly women's track team traveled to Stanford this weekend, while four athletes headed south to the competitive Mt. SAC relays.

At Mt. SAC, Kristina Hand ran a 9:30.80 in the 3,000 meter run. Hand, who is the leading runner in the 3,000 meters this year at the NCAA Division II level, beat her personal best by 13 seconds.

In the same race, Melanie Hiatt ran a 9:38.08, a time second to Hand in this year's Division II leading marks.

At Stanford, Gina Albanese ran a 61.34, and Shanin Miller ran a 62.5 in the 400 meter hurdles. Miller's time was a personal best and .5 seconds off Division II automatic qualifica-

tion standards. Albanese is leading Division II in that event.

In the 800 meter run, Dina Moore ran a season best 2:14.7, beating her old mark by three seconds. Other personal records on the track were set by Chris Hamilton in the 3,000 meter run and by the 400 meter relay team which ran a season best 48.11.

On the field, Julie Tingle high jumped a season best 5-4 1/4, and Margi Gilles placed third in the triple jump with a leap of 38-01 1/4.

The team also can be commended for its actions off the field as shown by the following statistics, found in the Athletic Director's office and the Evaluations office of the Administration Building.

The Cal Poly women's track team GPA (2.75) was higher than the school average (2.71), and

second highest of Cal Poly's 16 sports.

Only women's basketball (2.83) is higher, although many sports were near or above the school average.

Cal Poly Athletic Director Ken Walker has high praise for both the women's track team and athletes in general.

"Track has 30 or 40 people to figure in the GPA, and keeping it that high is a considerable achievement," Walker said. "It's easy for me to give praises to athletes. They are accomplished in so many areas, and this is a hard school academically."

Mustang women's track coach Deanne Johnson is also impressed with the team GPA.

"For them to carry the load that a normal student carries plus training plus a lot of them work, that's an exceptional effort

on their part," Johnson said.

Along with the overall excellence, eight members of the Mustang women's track team carry GPAs of 3.5 or better. Melanie Hiatt, a standout in the 3,000 meters who received a 3.8 last quarter, describes the challenges of being a student-athlete.

"You have to be very well organized with your studies. You can't put off readings to the night before because that could affect your training," Hiatt said.

Evaluations office official Missy West spoke of the history of excellence by Cal Poly women's track. "The tradition was started by (former head coach) Lance Harter, and Deanne Johnson has done a good job of carrying that on. When you look at the history of high team grades, women's track has always been there."

The Mustangs put together only three hits against Borowski, whom they defeated March 3 in Los Angeles. Cal Poly starter Dan Cherrey (5-4) surrendered two runs in nine innings and struck out six.

The Mustang bats were resurrected in Saturday night's game as they pounded out 13 hits against Golden Eagle starter Mike Mosebrook. He was chased in the fourth when Cal Poly scored four runs on three hits. With one out, Doug O'Neill cracked a three-run double that scored Cardinale, Juan Rojo and Tony Florez.

Mustang starter Jon Ifland (5-2), coming off an impressive win over Pomona, struck out seven and allowed only one earned run in eight innings. The senior from Santa Cruz is reemerging as Cal Poly's premier starter.

The extended homestand will continue on April 23 when Cal Poly will host Cal State Stanislaus for a single game at Sinsheimer Park. Then Chapman College comes to town for three games on April 25-27.

Van Dyke 7-5, 2-6, 6-2. Platt said the doubles teams all played well.

Platt now has to decide which teams to send to the Ojai tournament this week. "We'll have to see who's comfortable playing with each other. The doubles teams are all pretty close right now."

The rest of the singles scores for the Sacramento State match were: No. 1 Kanter defeated Melanie Wolters 6-0, 6-2; No. 3 Green beat Kelly Borcich 6-4, 6-0; No. 4 Tracy Matano defeated Christy Karau 6-0, 6-3; No. 5 Lean beat Lelisa Wolters 6-4, 6-1; and No. 6 Ciancio defeated Kerry Brown 6-2, 6-4.

In doubles No.1 Kanter-Lean defeated the Wolters sisters 6-3, 6-3; at No. 2 the Matano sisters defeated Borcich-Van Dyke 6-2, 7-6 (7-3); and No. 3 Green-Ciancio defeated Karau Brown 6-4, 6-2.

The Mustangs finish the regular season ranked No. 1 in the NCAA Division II national rankings.

They play this Thursday-Sunday at the Ojai Intercollegiates in Ojai. National championships begin for the Mustangs on May 3 at UC Davis.

JON ROGERS/Mustang Daily
Julie Ciancio lost at singles Friday but won her doubles match.

MEN

From page 5

defeated Mel Pereira 6-3, 6-3; No. 3 Max Allman beat Jay Taniga 6-2, 6-2; No. 4 Mark Nielsen topped Victor Johns 6-3, 6-1; No. 5 Marc Ollivier crushed Ed Chiuchiuchian 6-0, 6-0; and No. 6 Ricardo Reyes easily handled Eric Olivarez 6-1, 6-0.

In doubles the Mustangs all won in straight sets: No.1

Sasao-Havrilenko defeated Liz-zul-Pereira 6-3, 6-3; No. 2 Allman-Ollivier beat Taniga-Towers 6-3, 6-3 and No. 3 Nielsen-Reyes defeated Johns-Chiuchiuchian 6-1, 6-2.

The Mustangs ended their regular season against Chapman on Sunday and travel to Ojai Thursday to compete in the Ojai Intercollegiates tournament.

Oilers need two overtimes to even Smythe finals at 1-1

INGLEWOOD, Calif. (AP) — Petr Klima scored 4:48 into the second overtime to give the Edmonton Oilers a 4-3 win over the Los Angeles Kings on Saturday night, tying their NHL playoff series at a game apiece.

The play began when Craig MacTavish brought the puck out of Edmonton's zone and across the Kings' blue line on the left side and threw a cross-ice pass to Esa Tikkanen.

Tikkanen threw the puck down low and Klima redirected it past Kelly Hrudey from 10 feet out for his third goal of the playoffs.

The best-of-7 Smythe Division finals move to Edmonton for Games 3 and 4 Monday and Wednesday.

nesday.

For the second game in a row, Luc Robitaille scored a tying third-period goal for Los Angeles. With the Kings down 3-2 at 6:32, Robitaille broke down the left side and fired a slap shot from the faceoff dot that sailed over Grant Fuhr's left shoulder for his seventh playoff goal.

The Kings won 4-3 Thursday night on Robitaille's overtime goal. The Oilers had Bill Ranford in the nets but went with Fuhr for Game 2.

Los Angeles got off two shots in the last 10 seconds right in front of the Oilers' net but Fuhr saved both and Edmonton went into its fourth straight overtime game.

BEANIE

From page 1
traditions that united the school. "We could make old Mustang Stadium rock in the old days," Glidden said.

Glidden said he is concerned about today's Cal Poly students. After just experiencing the Persian Gulf war and losing a very special tradition with Poly Royal, Glidden said the students need some kind of diversion. Increasing pride in the university could be the answer.

As Glidden reflected on Cal Poly's past, he said, "when we were coming from behind in a competition we would just say, 'Here come the Mustangs!'"

Glidden added that they were very proud of their school and the mustang as their mascot. The decal was only a part of that pride.

The phrase "A Living Tradition" was added to the decal to show its revival.

The Veterinary Science Club

began selling the decals last weekend at Poly Agri View, a two-day open house for the School of Agriculture.

The decals come in two sizes. The large decal costs 60 cents for one, or two for a dollar, and the little decal costs 40 cents for one, or three for a dollar.

The money will go toward a trailorable petting zoo that the Veterinary Science Club is making for the La Fiesta Festival in May.

President of the Veterinary Science Club Kim Emery thinks bringing back the decal is a great idea.

"We need ideas like these to get things done like they were done in the first place. We need traditions, for example, to get Poly Royal back," Emery said.

What could possibly have inspired Glidden to track down the decal?

After undergoing heart surgery and having some other

health problems, Glidden has taken on a different outlook.

"I'm glad to be alive. When you recover, you look at your values," Glidden said.

One of these values Glidden has is to try to bring back some of the old Cal Poly traditions. And maybe, just maybe, this university could experience some of that school pride and unity that used to make Mustang Stadium rock.

FAIR

From page 1
groups are sending representatives.

Lopez said, "Quite a few are not attending because they are unable to send a person to staff a table. But the mix we have is very representative of the invitation list."

She said many other organizations have sent literature which will be available at the fair, and she stressed that even though the event is part of Women's Week, it is open to everyone — women and men.

Some of the participants include:

- The Cal Poly Nutrition Club and the Center for Women and Ethnic Issues, which is sponsoring Women's Week with financial support from California State Lottery funds.

- San Luis Obispo County Alliance for the Mentally Ill — a support group for families and friends of mentally-ill persons.

The group is involved in a variety of mental health issues, and its objectives include: providing support, education and information, advocating legislation, promoting research and working towards the eradication of the stigma associated with mental illness.

Barbara Barnard, the group's vice-president, is in charge of all programs and special events. She said that mental illness is a "no fault illness," and that it is greatly misunderstood.

"I hope that by coming to Cal Poly we might reach people who have a mentally-ill family member," said Barnard, "for instance a student who has a sibling or parent with a mental disorder and who doesn't want to tell his or her friends."

- H.P. & Company — a central meeting place and resource center for San Luis Obispo 12-step self-help programs.

The facility is the meeting place for 18 different groups, including Alcoholics Anonymous, Debtors Anonymous, Alanon, an incest survivors group and several CODA groups for "co-dependents."

Smith said two of the groups are specifically for homosexuals: one CODA group and one ACA (adult children of alcoholics).

- Model Mugging — a method of self-defense training which teaches "rape-specific defense".

- Women's Resource Center — an information and referral agency.

Doris Turrill is one of the all-

volunteer staffers at the center. She said the center offers drop-in support groups, a lending library and divorce workshops for women involved in uncontested divorces.

- Women's Investor Club — a resource for anyone interested in expanding their knowledge about financial issues.

Amie Young founded the group, a local chapter of Financial Education Clubs. She said it is open to everyone, but it is oriented towards women.

"The premise was that this would be a safe place for women to go and ask the silly questions about financial matters that they might otherwise be afraid to ask," Young said.

She said that this is a new concept for this area and that

Here in SLO!
One Day Only
Tickets on Sale
THURSDAYS
U.U. 11A.M. - 1 P.M.

she would like to get more younger people involved. She looks forward to meeting any Cal Poly students who have an interest in their financial future.

- Women's Retreat — an annual autumn retreat for women at Rancho El Chorro, five miles west of San Luis Obispo.

The 1991 retreat will be the ninth annual for organizer Manuella Schreiner, who first conceived the idea when her three children were living at home and she felt she needed some personal time.

The retreat features gourmet vegetarian meals and a variety of workshops. Participants are encouraged to participate in as many or few of the activities as they would like to, said Schreiner.

"One year we had a writer who came and stayed in her cabin and wrote. She came to meals, and that was all," Schreiner said.

- Zero Population Growth — a population education and lobbying organization.

Chairperson Bonnie Walters said this group is interested in educating people about the problems of population growth.

"We advocate limiting families to two children, which will eventually lead to zero population growth," said Walters.

Other organizations scheduled to participate in the Provider's Fair include Planned Parenthood, Rape Crisis Center, Hospice of SLO County and the Coalition on Victim's Equal Rights.

School of Ag stages Poly Royal alternate

■ 'Agri View' attracted thousands for activities.

By Meredith Rehman
Special to the Daily

While most people stayed inside their homes on a rainy Saturday morning last weekend, many students were hard at work welcoming visitors to "Poly Agri View," the School of Agriculture's answer to the absence of Poly Royal.

Thirty-two clubs and nine departments within the School of Agriculture participated in the two-day event, which attracted thousands of students, parents and alumni.

Friday was aimed toward students, with educational exhibits and morning tours focusing on the agricultural displays. Saturday, which was geared more for adults, did not include as much hands-on learning but still featured close-up views of the

agricultural units.

The guests, who were personally invited by individual departments and clubs, were able to choose from a wide variety of educational displays, including logging and tractor demonstrations, horse shows, applesauce manufacturing and dairy showmanship.

"It was a new adventure for all of us," said Joe Sabol, associate dean for the School of Agriculture. "It brought out a lot of creativity in our students and faculty because they had to think of some new educational activities for the guests. I think we did it right."

Although the rain forced the opening ceremony to be moved indoors to the Agricultural Engineering shop, it didn't prevent guests from taking part in the

See AGRI VIEW, page 8

JON ROGERS/Mustang Daily

Dwayne Ross, an agribusiness senior and Agri View host, showed visitors how computers are becoming more prominent in agriculture.

Symposium addresses packaging

■ Innovation '91 brings industry to Poly to discuss solid waste issues.

By Christy Rinauro
Staff Writer

They come in all shapes, forms and sizes. Their appearance on products marks the start of a product's public life. Once torn, peeled or cut away from their products, they find themselves discarded and sitting atop an overflowing landfill.

Packages. Most people cannot name anything bought lately that did not come packaged.

Packaging, the third largest industry in the country, will be one focus of Innovation '91: The Fourth Annual Plastics, Packaging and Recycling Symposium, taking place in Chumash Auditorium on Wednesday and Thursday.

Innovation '91 addresses the current solid waste management crisis, the efforts of industry and government to manage that waste and the new plastics and packaging technology aimed at solving the problem.

"There are a lot of myths out there, things that are completely untrue," said Dan Kruger, publicity chairperson for Innovation '91. "This is the perfect chance to ask questions and get an insight to industry, and it's a rare chance to talk with the people who deal

directly with the engineers."

Kruger said Innovation '91 brings the "doers" of industry to campus to provide the most updated information on real-world solutions through company and product exhibits, lectures and an open forum and panel discussion.

Representatives from Apple, Beatrice/Hunt Wesson Inc., DOW, Great Western Foam and many other companies will be attending.

The event, coordinated by the student chapters of the Institute of Packaging Professionals and the Society of Plas-

tics Engineers, is meant to be beneficial to both industry and students.

John Stead, coordinator of packaging education and a professor in the industrial technology department said the symposium is not only an opportunity for students to meet with industry leaders to learn how to conserve resources, but also for industry to hear student concerns and notice student potential.

"This is an opportunity for industry to talk to Poly stu-

Living quietly above the east side of campus is a large letter "P" that must be part amoeba and part chameleon because its shape and color change as often as the winds.

This "P" is also a very sloppy creature, leaving sheets, beer cans, paint buckets and other trash on its hillside.

Last quarter Cal Poly's Executive Dean of Facilities Administration, Doug Gerard, threatened to exterminate the "P" because its messiness was getting out of control.

Gerard said, "The defacing of the 'P' and trash left on its hillside has inappropriate overtones, particularly in a university atmosphere." Gerard said if the "P" was not kept its original white color and the hillside not kept clean, the "P" would be removed.

Gerard's threat prompted ASI Chairman of the Board Mark Denholm to create the Pride of the "P" committee to keep the symbol clean.

The committee contacted clubs on campus willing to participate in keeping the "P" clean. Pride of the "P" organized the

Ambassadors recruit for Poly agriculture majors

By Lori Cheeseman
Staff Writer

For the past three years, the School of Agriculture has had a strong arm at its side, reaching out and pulling in more students than ever before. They are Agriculture Ambassadors, a student group that acts as a public relations and recruitment organization.

Members of Agriculture Ambassadors travel to high schools and community colleges throughout California, actively recruiting students into agricul-

tural majors at Cal Poly. The group's trips are paid for by donations.

Although they specialize in agriculture, the ambassadors provide general information about Cal Poly, as well as give tours of the school and represent the School of Agriculture as hosts whenever they are needed.

Roy Killgore, president of Agriculture Ambassadors, says that the primary goal of the group is to encourage students to continue their education at the university level. Many times stu-

Cattle to blame in Poly Canyon

For the past three years, Poly Canyon has been a favorite mountain biking area of mine. Imagine the frustration I felt then upon discovering that the canyon has now been closed to bikes. Those responsible for closing it state that mountain bikers are destroying the environment. I find the sudden concern over "the environment" (as expressed by Larry Rathbun and Doug Gerard in a recent *Mustang Daily* article) grimly humorous when I consider how little the destruction caused by cattle evidently mattered in the past. More than anything else, cattle have been responsible for the damage in Poly Canyon since they crap in the creeks, turn the roads into a mire of mud and manure, and destroy ground cover. If concern for the environment is such a big issue, eliminate the cows from Poly Canyon, not the mountain bikes.

The most serious erosion problems in the Canyon occur on the roads which were hastily cut without much thought to drainage and which are serviced by poorly maintained and undersized culverts. Mountain bikers should not be blamed for this problem. As for the issue of open gates — lock them. I personally have found it easier to jump over the gates than to open them anyway.

Finally, I find it hard to stomach the fact that a handful of Ag students and their cows get to romp around in this huge and beautiful area while the rest of us thousands of Cal Poly students are restricted to riding our bikes on a painted green strip below the science building.

Monte Reinders
Civil Engineering

Correction

For the record — In the April 22, 1991, issue of *Mustang Daily*, the softball article contained incorrect facts and quotes.

•The team did not move into first place in the CCAA.

•Lisa Johnson started and won the first game. Laura Fawcett relieved Johnson in the late innings.

•In the second game, Julie Rome was not pitching a perfect game when she gave up a hit in the fifth inning. She walked batters in the first and third innings.

•The team is not a "sure bet" to make the playoffs.

•Head Coach Lisa Boyer said only that the team played with a lot of intensity and desire and came up with a pair of big wins.

ELECTION LETTERS

A letter supporting ...

David Kopic

I am writing this letter as a concerned student based upon my experience as a member of the Board of Directors for two years.

Our current ASI President claims he believes in being "accessible, honest and open." I urge all students to consider his track record in this light.

Although he has done well with ethnic relations, he has failed miserably with community relations. After hearing Mayor Ron Dunin on April 12, 1991, I am concerned that the future of the Student Community Liaison Committee is uncertain. Our Mayor spoke of an ASI president that was unresponsive and inflexible in the role of a com-

munication link between students and the city.

Our president has put much acclaim to his lobbying trips, yet budget cuts are mandated by the Board of Trustees and are already taking effect.

His entire image as a "people person" might be exemplified by his *Mustang Daily* quote "They should accept you for what you are. And if they don't, fuck 'em. You can quote me on that one. Fuck 'em." I wonder how far this attitude gets him with President Warren Baker, with whom he claims to have only met four times during his term. Even this meager statistic has been questioned for validity.

Taylor even missed the an-

nual meeting of the University President's Cabinet which determines crucial decisions for next year and future planning. Many believe our ASI president has simply gotten through this year by riding the coattails of his staff and by covering up the blunders until next year.

There is an alternative — Dave Kopic. An honest, hardworking and ethical student leader who is in touch with all student needs, not a simple few. Your vote will only make the difference.

Let your voice be heard on Wednesday.

Michael J. Gomes
Former vice chair of
ASI Board of Directors

Adam Taylor

Cal Poly ASI elections are an aspect of our students' life that do have a significant impact which many students do not anticipate. I would like to take this opportunity to offer additional information to the students so that they will be able to make an educated decision in the presidential runoff. Adam Taylor is and has been an honest, straightforward and effective president for Cal Poly. Students must consider what is needed and what can be done by the ASI president.

Adam is not one who claims to know it all or run the whole show, but is one who instigates changes, takes risks, encourages his staff to produce results and has the backbone to stand up for the students when needed. Adam is in touch with his students on this campus and all the programs ASI provides. Adam has supported many of the programs we are all involved in, explores the options available and most importantly, places emphasis on the students and program prospering, but not at the expense of others.

It is for these reasons that I support and endorse Adam Taylor for ASI president. If you voted for me in the preliminary election, you will best match that vote by voting for Adam Taylor

in the runoff.

I am confident in his integrity and dedication to the student body. Special interest groups are a fact of politics, and Adam does not "buy in" to these political pressures either. I was courted by representatives from the athletics groups, and had I signed their document pledging my complete support to an IRA fee increase, I would have received the complete support of the athletes in the election. By my not signing the contract, it was interpreted that I was anti-athletic, which I am not. I believe that athletics is an important part of Cal Poly life and students need to make the decision if they wish to place approximately a million dollars of their money a year into this program.

The importance of the situation is to realize that Adam also feels athletics is an important part of student life, and if you examine his track record, you see he has played an active role in this sensitive issue. More importantly, if the students of Cal Poly want their ASI president to represent them in all endeavors, they must not elect a president who "makes deals." Where is the representation there? Adam has not, and would not, sign any contracts with special interest groups and maintains the strength to stand firmly on his feet for all the students of Cal Poly.

Adam supports the WOW program, athletics, ethnic studies program, greeks and many other groups on campus, and it would be in the best interest of all students to elect a president who has the experience, understanding and drive to make a difference. Working on the ASI executive staff this year I have seen this difference and have seen things happen.

As students we may not have seen "instant" results, yet in this past year Adam and his staff have brought you proposed city zoning plan changes, extended library hours, the initial stages of a teacher evaluation catalog, an ethnic relations committee and ASI Week for the students among many other changes.

As many of you know, Adam is the one who has the strength of knowledge and experience in representing the students with the proposed state budget cuts. This is not an issue to be taken lightly, and Adam is the candidate who would be able to represent the students efficiently and with strength in Sacramento.

Vote Wednesday to let your voice be heard, and vote for a candidate who will hear your voice. Re-elect Adam Taylor for ASI president.

ASI Marketing Coordinator

WORLD

Women stride forward in Japanese elections

TOKYO (AP) — Japanese voters have elected the nation's first woman mayor and placed a record number of women in city assembly seats, unofficial results from nationwide local elections showed today.

Another winner Sunday was Hitoshi Motoshima, the mayor of Nagasaki, who was wounded by an ultra-rightist gunman last year after saying Emperor Hirohito bore some responsibility for World War II. He was re-elected to a fourth four-year term.

The Social Democratic Party, Japan's No. 1 opposition group, suffered setbacks in voting for Tokyo's 23 ward assemblies. These followed its biggest election defeat in party history in local balloting earlier this month.

In Ashiya, a western city of 88,000 people, Harue Kitamura, 62, was elected as Japan's first woman mayor after campaigning for better education. The independent candidate, who is a lawyer, defeated an incumbent backed by the governing Liberal Democratic Party.

"More women should become involved in city politics," the mass-circulation daily Asahi Shimbun quoted Mrs. Kitamura as saying. "They should also advance to management positions if they have the ability."

"Mother Power Wins" and "Aproned Supporters Cheer" were among the national dailies' headlines announcing her victory.

"(Mrs. Kitamura) will undoubtedly serve as a great lighthouse for women aiming for participation in political decision-making," Asahi Shimbun quoted Teiko Kihira, a woman who is a member of Parliament, as saying.

Baker bids for support in Mideast peace talks

KUWAIT CITY (AP) — Secretary of State James A. Baker III headed for Damascus on Monday in hopes of enlisting Syria's participation in a Mideast peace conference. Earlier, he bid for Soviet cosponsorship of the initiative and gained the sideline endorsement of Saudi Arabia.

Baker's scheduled sessions with President Hafez Assad and Foreign Minister Farouk Sharaa loomed as his most difficult challenge on the Arab side, as he attempts to fashion a format and agenda for the prospective peace talks. He was expected to return to Israel on Tuesday in hopes of resolving its concerns about the scope of the proposal.

On the way from Jiddah, Saudi Arabia, to Damascus, the secretary of state took a brief

NATION

Report says poor pay higher taxes than rich

WASHINGTON (AP) — The poorest U.S. families pay 81 percent more of their average \$12,700 earnings in state and local taxes than do Americans making \$875,200 a year, a private research group said Monday.

Middle-income families, with earnings that average \$39,100, must turn over a one-third bigger share of their incomes to state, city and county governments than do the wealthiest 1 percent, said Citizens for Tax Justice.

In both cases, the disparity is worse than it was five years ago, said the organization, which is financed by labor, church and social groups.

Despite long-held beliefs that taxes in the United States should be based on ability to pay, the study concluded, "when all of the major state and local taxes are added together, virtually every state taxes its poor and middle-income families at rates significantly higher than those faced by the richest families."

"The biggest problem is over-reliance on regressive sales and excise taxes rather than on progressive, ability-to-pay income taxes," said Robert S. McIntyre, director of Citizens for Tax Justice.

Lenny Goldberg, executive director of the California Tax Reform Association, said the tax burden in California is 1.3 times greater on the poor than the very rich. He said many of the proposals to eliminate a \$12.6 billion state budget deficit would make the situation worse.

Analysts: Gorbachev will lose power soon

WASHINGTON (AP) — U.S. officials are reluctantly concluding that Soviet President Mikhail S. Gorbachev's government is paralyzed and the initiator of world-shaking reforms at home and abroad may not hold power much longer.

Kremlin watchers in Washington are studying the most likely successors and considering what a post-Gorbachev Soviet Union may look like.

Gorbachev has enjoyed hearty support from President Bush, who made no secret of his hope that the Soviet leader would succeed. But Bush advisers and State Department analysts now say privately that Gorbachev appears unable to regain control of his fractious country and that his time may be running out.

"He's getting pretty close to the edge," said one influential Soviet affairs analyst at

Paper rates Palo Alto best city in Bay Area

SAN FRANCISCO (AP) — For the second time, a newspaper has rated Palo Alto as the best place to live in the San Francisco Bay area.

The San Francisco Chronicle ranked 98 area cities and towns based on subjective ratings of things such as housing, schools, income, recreation, crime and commuting time.

Palo Alto was 54 points ahead of second-best San Rafael and ranked first in medical — the number of physicians and hospital beds per capita. San Rafael came in second in the cultural and recreation category, while third-place Sausalito ranked third in personal finances.

The rankings, published Monday, follow a similar rating the paper conducted in 1988.

San Ramon, ranked 57th overall, came in first in the economy rating — the projected job growth rate and per capita nonresidential building valuations. Oakland, ranked 61st, was rated as having the best weather along with Alameda (33rd), Piedmont (38th) and Hayward (44th).

Others rated first in specific categories were: Los Altos (9th overall), housing and schools; Larkspur (23rd), personal finances; Mill Valley (5th), culture and recreation; Hillsborough (27th), lowest crime; Portola Valley (19th), open space; and Berkeley (46th), dining.

San Francisco, ranked 24th, had the best rating in the commute category — not the distance to the city but rather the distance people travel in order to get to work.

Study rates L.A. area views on environment

LOS ANGELES (AP) — Most Southern Californians are environmentally savvy but they aren't willing to part with their beloved automobiles or curb water consumption, an "Environmental Report Card" released Monday showed.

Residents deserve an environmental "A" for concern but only a "C-plus" for their response, said University of California, Los Angeles, researchers, using Earth Day to release an ecology survey of 316 residents.

"Southern Californians are discovering that their initial success in recycling valuable resources and using less water are a small price to pay for a planet we can be proud to pass on to our children," said UCLA professor Richard Berk.

The survey showed that many residents eagerly accept a technological fix, such as low-flow showerheads and toilets, Berk said.

Preparation can make European travel smoother

Gabrielle Friedly
Staff Writer

Many students take the opportunity while still in college to round out their education by taking a summer tour of Europe.

Tim McWilliams, ASI travel adviser, has several suggestions for anyone preparing for such an adventure.

The first step is getting a passport. Applications can be picked up at County Government Center, said McWilliams, a biological sciences junior. Each student must show the original or a copy of their birth certificate for verification. Two pictures must also be given which can be taken at Kinko's Copy Center for between \$8 and \$10. The passport itself costs \$35, he said.

"It takes about three weeks to get the passport, so its good to start the process early," said Felice Morocco, ASI Travel Center coordinator.

The next step to a fun and exciting trip is to decide which countries you are most interested in visiting. McWilliams suggests, "Let's Go Europe," a book that breaks down each country in alphabetical order.

"The book tells everything you need to know about each country," McWilliams said.

McWilliams suggests making a schedule of places you wish to visit. "You probably won't stick to the schedule, but its good to have a guideline," he said.

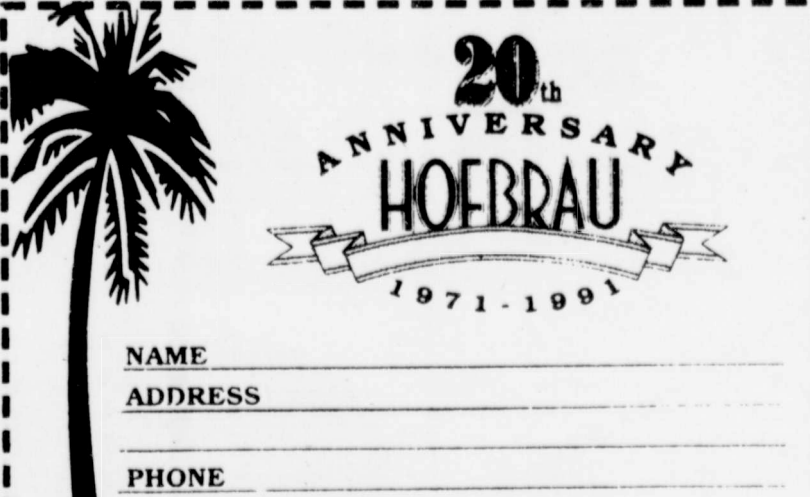

McWilliams said, "You do not want to rely on it (the book) for accommodations

Doctor warns students of cancer risks

■ Being informed about skin cancer is key to preventing it.

By Tracy Condon
Staff Writer

Skin Cancer. Any mention of it on the beach, in the midst of sunbathers, and you could find yourself with a fistful of sand in your face. However, skin cancer is a growing concern among physicians, and being educated about this form of cancer could save your life.

"It's not impossible for someone in their early 20s to get skin cancer, but someone in their late 30s or early 40s is much more likely," said Richard Ascoli, a Cal Poly Health Center physician.

Ascoli said it is important that students, especially those with fair skin, are informed about skin cancer.

According to the Neutrogena Skin Care Institute, last year more than 600,000 Americans were newly diagnosed with skin cancer, making it the most common form of the disease.

Excessive exposure to the sun is the greatest known risk factor in the cause of skin cancer.

Skin cancer can be most readily cured when it is discovered early and treated promptly. Being informed about the disease and aware of its symptoms can prevent a battle with this sometimes deadly cancer.

There are three major types of skin cancer: basal cell carcinoma, squamous cell carcinoma and malignant melanoma.

Basal cell carcinoma is the most common. The basal layer of the skin is the deepest layer of the epidermis (the top layer of skin). It usually starts as a small shiny bump on areas which are normally unprotected from the sun, such as the head, neck or hand, and it grows slowly. When untreated, the bump may crust over or bleed. It can grow but is not usually life-threatening.

Squamous cell carcinoma is common-

JON ROGERS/Mustang Daily

Four Cal Poly students behind Tenaya Hall relax in the springtime sun. But sunbathers this summer will have to take more precautions from damaging rays that cause skin cancer, the nation's most common form of the disease.

ly found on the face and ear tips as a knob-like bump or as red blotches. Squamous cells are present in a layer directly above the basal layer of skin.

Squamous cell cancer, less common than basal cell cancer, tends to grow faster. It is also more likely to "metastasize," meaning it will spread to other internal systems of the body, which can, in turn, become cancerous.

The last type of skin cancer is melanoma, and it is the most dangerous. This cancer begins in the melanocytes, the skin cells that produce the dark protective pigment called melanin. When exposed to sunlight, the melanin in skin increases to form a protective layer in the form of a suntan. Melanoma consists of melanocytes which have been transformed into cancer cells that grow uncontrollably.

Once colonies of melanoma cells

reach vital internal organs and grow, they are much more difficult to treat, making melanoma a potentially lethal form of cancer.

Ascoli said that if people know the symptoms, they are more likely to seek treatment. Sometimes, though, they wait too long. "If you get care early, you can cut the cancer off," Ascoli said.

Melanoma shows up looking like a mole. If a mole undergoes a sudden or continuous change, that is a sign to see a physician. Possible symptoms of melanoma include when one half of a mole doesn't match the other half, the borders of the mole are ragged, the pigmentation is different shades of color or the diameter of the mole is greater than six millimeters.

Anyone can get skin cancer.

A new popularity in skin-tanning has been the use of tanning parlors. It is

possible to get skin cancer in tanning booths but not as likely.

"All tanning rays are risky; however, tanning booths use longer rays which are less damaging and much less risky for causing skin cancer. But it is not risk-free," Ascoli said.

Adrienne Teffeteller, a sales representative at Sundance Tanning Center, said beginning tanners will sit in a booth for only 10 to 15 minutes. Tanners then build up, but Sundance will only allow their customers 30 minutes maximum to prevent burning.

"Here, you build up to a certain color, and you stop," Teffeteller said. "In the sun you keep getting darker and possibly burn."

Being informed about skin cancer is the first step in prevention. More information can be obtained at the Health Center.

STATE

From page 3

"However," he said, "Southern Californians are very reluctant to change their driving habits, and we've noted some resistance to water conservation as well."

The Save the Earth Foundation funded the Environmental Report Card survey.

"If we could think of Southern California overall as a student enrolled in a course on sound en-

vironmental practices, and consider our survey as an exam, I would give this student an 'A' for environmental concern and a 'C-plus' for actual performance," said Berk.

detour to Kuwait to reaffirm U.S. support of the emirate.

Before leaving Jiddah, Baker had a 35-minute telephone conversation with Soviet Foreign Minister Alexander A. Bessmertnykh. Baker wants Moscow to cosponsor the peace talks, provided the Soviets resume full diplomatic relations with Israel after a 24-year lapse.

Bessmertnykh is expected to make a trip to Israel soon. Baker's detailed briefing of the Soviet official and the fact that he was keeping his schedule open raised a possibility that Baker might fly to Moscow to firm up a jointly sponsored con-

ference, provided he can resolve the Arab-Israeli differences over the agenda and the extent of third-party participation.

The Saudis confirmed during Baker's meetings in Jiddah with King Fahd and Prince Saud, the foreign minister, that they would not participate directly in peace negotiations though they may take part in dealing with such side issues as the environment.

But Prince Saud, seeing Baker off to Kuwait, said "It was conveyed to the secretary that Saudi Arabia believes it is time to put an end to the Arab-Israeli conflict and to achieve a comprehensive and just solution to the Palestinian question."

Varied services given at little-known center in agriculture building

■ Students can find administrative forms and needed help at the Student Resource Center.

By Aaron Nix
Staff Writer

Being successful at Cal Poly means facing many challenges over the years. There are forms to fill out, requirements to meet and advice to seek from a variety of sources.

The average student probably would find it hard to believe that one place on campus can assist in all these areas, plus help in finding internships and jobs after graduation.

"Most people don't even know we're here," said Shannon Hamilton, a facilitator at the Student Resource Center. "I've had friends who are graduating seniors wander in here, look around, and say 'what do you guys do here, anyway?'"

The Student Resource Center offers guidance to people seeking information about services available on campus. Located in room 202 of the Erhart Agriculture building, the center is run by junior and senior agriculture-related majors who volunteer their time to answer student questions.

"Most people come in here for forms, like add/drop slips and petitions," said Shelly Stace, a student facilitator and agriculture science senior.

"We have just about all the forms found at the Administration building, and we're more than happy to help students fill them out."

The center can be particularly useful to incoming freshmen who are unfamiliar with college life.

"New students usually don't know where anything is," Hamilton said. "We can help them with everything from locating laundry facilities to filling out course deviation forms. They just need to come in, and they can probably get the help they need right here."

"This is definitely a place where the older students pump up the younger ones," Stace said. "When a person is new and unsure, it's hard to see the light at

the end of the tunnel. The advisers here are all juniors and seniors, so we have the information and experience necessary to help students keep the ball rolling."

Hamilton said the center also has plenty to offer to older students preparing for life after graduation.

"We have a file cabinet full of information on co-ops, internships and graduate programs," Hamilton said. "We can provide references from fellow students on the quality of many of the opportunities, and in some cases we have the connections to help students get their foot in the door."

Most of the services provided by the center were developed over the years by the volunteer advisers. According to Hamilton, a facilitator gets one or two units of course credit for working at the center, depending on how much work is done. Those earning two units must complete a project related to the center, improving the quality in some way. Past efforts have brought the center new resources such as a computer terminal and a coin-operated copy machine.

Stace and Hamilton agreed that anyone could find a use for the center, regardless of their major.

"It's true, this place started out serving primarily ag business students, but we welcome anyone to come in for help," Stace said. "Because of the new CAPTURE registration system, it seems students don't talk to advisers in their own departments anymore. We realize what a gap that creates between the faculty and students, and the 15 of us who volunteer here are available to help bring things closer together."

The Student Resource Center is open Monday through Thursday from 9 a.m. to 3 p.m., and Fridays from 9 a.m. to 2 p.m. No appointment is necessary, and an adviser is always on hand to answer questions.

NATION

From page 3
State. "The situation looks very precarious," said another.

One official with long experience observing Soviet affairs said the administration has received recent signals from various sources indicating that Gorbachev is in serious trouble and is "maneuvering furiously to protect his flanks and undercut the opposition."

"He's very much aware of the threat," the official said.

Administration officials are reluctant to comment openly about Gorbachev's political survival, and those who spoke to The Associated Press did so only under anonymity.

Other observers injected a note of caution, saying there is much hysterical talk but little hard evidence.

John D. Steinbruner, director of foreign policy studies at the Brookings Institution, said, "I do not see signs of his imminent demise."

"He has balanced the overall politics in a way that doesn't make it easy to get at him," Steinbruner said, though he acknowledged, "One never quite

knows where the breaking point is."

State Department Counselor Robert B. Zoellick, in outlining Bush administration policy on Capital Hill recently, alluded to the "increased uncertainty about the future course" of the Soviet Union.

The United States, he said, "should try to manage uncertainty by multiplying our channels of information and increasing our points of access with a rapidly changing Soviet society."

The administration is attempting to broaden its contacts at all levels of the Soviet power structure while trying not to undermine Gorbachev, whom it still regards as a friend and a positive force for change.

"We are resisting the advice of critics who say we should wash our hands of Gorbachev," said one well-placed official. "We don't count him out."

Bush is pressing to settle a dispute over conventional force cuts in Europe and to complete work on a strategic arms reduction treaty (START) while he still has a sympathetic counterpart in the Kremlin.

TRAVEL

From page 3
though because everyone traveling in Europe has the book." It is better to purchase a Youth Hostel Card and the International Youth Hostel Directory to aid in accommodations.

An International Student I.D. is also worth purchasing for \$14, McWilliams said.

"The card basically pays for itself," he said. The student will receive discounts throughout Europe including museums, car rentals and some hotel accommodations, he said. The I.D. also provides \$4,000 insurance coverage.

Student discounts on round-trip airfare can be worked out through any travel agency. "In general, the average rate to Europe will be around \$800

round-trip during the summer," McWilliams said.

For the most part visas are not necessary, McWilliams said. All of Western Europe and much of Eastern Europe do not require them, he said. The ASI Travel Center has a list of which countries require visas.

Once you are in Europe, the easiest way to go from country to country is by way of European trains. Many people travel at

night to save money on accommodations, McWilliams said. "There are couchette cars (sleeping cars) that have bunkbeds with provided linen that are fairly comfortable," he said.

Marocco said, "If you plan to travel on the overnight trains, you should make reservations a few days before to assure a couchette car."

Security should be a major concern for all European travelers. "If you go with a conscious attitude and have a little bit of sense, you should be fine," Marocco said. All valuables should be kept in a money-belt. Many students also carry fanny-packs, but students must be careful with these because they can unsnap easily, she said.

In case anything is stolen, "It is good to make copies of your passport and the numbers on the traveler checks," Marocco said.

One set of copies should be left at home and the other set should be given to a fellow traveler. "This way if your passport or any traveler checks are stolen, it is easier to get new ones while in Europe," she said. "Traveler checks are the safest way to travel," Marocco said.

The ASI Travel Center is providing free weekly workshops on European travel. The next is Wednesday from 6 p.m. to 7 p.m. in U.U., room 218.

Men's tennis gears for nationals after taking third conference title

By Geoff Seratti
Staff Writer

The Mustangs men's tennis team clinched its third consecutive conference title during the weekend, beating shorthanded Chapman 5-1 on Sunday at Cal Poly.

The Mustangs improved to 29-1 in the conference over the last three years. They now have won 24 conference matches in a row. Cal Poly is 14-8 and 10-0 in the conference.

Coach Kevin Platt said it is a great feat. "Ours is the toughest conference in the country. Bakersfield and Riverside are much improved as is the rest of the conference. It's great not to lose to those teams for two-and-a-half years."

Chapman only brought five eligible players to the match, and Platt said even though Chapman is ranked No. 10 in Division II, they are substantially weaker than in past years. "They are the weakest I've seen them in nine years. They are usually a strong top-10 team every year. They

have lost a couple of players to injuries and suspensions this year."

The only loss for the Mustangs was Eric Sasao at No. 1 singles. He struggled and lost in straight sets 6-2, 7-6 (7-1), to Laurent Dropsy.

Platt said Dropsy was the rookie of the year in the conference two years ago. "The guy played great, really consistent. That's the best match he's played in two-and-a-half years. Eric's been struggling, not playing his best." Sasao has had the best record on the team over the past three years. Platt said he has played only a couple of matches up to his usual standards this year.

Cal Poly swept the rest of the singles matches in straight sets, and doubles was not played. No. 2 Alex Havrilenko defeated Aris Vassiliou 6-1, 6-4; No. 3 Max Allman beat Bruce Wolfram 6-2, 6-0; No. 4 Mark Nielsen routed Roland Ressig-dire 6-0, 6-0; No. 5 Marc Ollivier won when Ken Nakama forfeited due to injury 6-0, 2-0; and the No. 6 singles match was defaulted by Chapman.

As a team the Mustangs are ranked No. 2 in Division II heading into nationals. Individually they have four players ranked in the top 50 in national singles play. Sasao is ranked No. 2 in the nation; Havrilenko 19th; Allman 36th and Nielsen is ranked 48th.

In doubles Sasao-Havrilenko are ranked fifth in the country while Allman-Ollivier are ranked 12th.

In a tuneup for nationals, some of the Mustangs are playing the Ojai Intercollegiate beginning Thursday. In the independent intercollegiate, Platt said Allman and Ollivier will play singles and doubles.

Top players from teams in the CCAA conference, Pepperdine, Loyola Marymount and other teams, will compete in that tournament, Platt said. For Allman and Ollivier, "It will give them a chance against top teams to see if they can do well and maybe get a seeding at nationals," Platt said.

In the intercollegiate invitational tournament, also at Ojai, Sasao and Havrilenko will play singles and doubles for the

Mustangs. Platt said high-ranking players from tennis powers including UCLA, Stanford, USC and UC Berkeley will play at the invitational.

Platt said the Ojai weekend is a busy time for him, since the team is playing, and he is recruiting for both the men and women. Platt said he will not be able to coach as much at Ojai, and the players will be

more on their own in matches.

Many Mustang players should garner all-conference honors. Platt said Ricardo Reyes and Allman have been undefeated in singles and doubles play in the conference all year. He said the team should get every player on the all-conference team. "We deserve it," he said.

Allman could win player of the year in the conference, Platt said. Allman has only one loss including non-conference matches, and the loss was to the No. 1-ranked player in the country in Division II.

The team begins defense of its 1990 NCAA Division II national title on May 10 at the nationals in Oklahoma.

SYMPOSIUM

From page 1

dents because many people in industry are unfamiliar with the potential here. It's also a way for us to help the industry get the word out about career opportunities and let them tell their story to Cal Poly," Stead said.

Kruger, an industrial technology senior, said people from every major should attend the free symposium.

"It seems that in almost any field you'll be going into, you'll be dealing with environmental issues; they're very big now," Kruger said. "People also need to make some informed decisions, especially with the new ballot measures we'll need to vote on."

"People should come out and ask the important questions themselves and get the right answers."

Thursday's recycling forum will provide opportunities for students to ask a panel of industrial, governmental, environmental and educational experts about pending issues in the industry.

The forum will be held in Chumash Auditorium at 11 a.m. and will be moderated by Lynn Diehl, KSBY-TV anchor woman.

"This will give you a different perspective on things," Kruger said. "It should help you understand the liabilities of products."

"Plus, it's good free information," Kruger said.

AGRI VIEW

From page 1
rest of Saturday's events.

"Everybody knew we had to move the flag ceremony inside, and they all worked very hard and quickly to make it good," Sabol said. "The weather was really bad that day, and I know that some people stayed home because of it. But the crowd was a good one; they were happy, they were the right people and they came to see us."

Sabol said there wasn't just one exhibit that stood out as the most successful, because they were all great. He said that the

ornamental horticulture display, however, was especially unique because of its extensive setup.

Ron Regan, ornamental horticulture department head, agreed that the display was unique because it depicted the nature of the department through 24 different exhibits.

"The department invited about 170 junior high school science students and a couple of high school classes to come to the event," Regan said. "The young students were put into groups, which were hosted by ornamental horticulture students, and

given tours through the exhibits."

Pi Alpha Xi, an ornamental horticulture club, sponsored a community flower show, a 15-year-old event. Three hundred entries were received and judged for the show and put on display for the public.

"We had a lot of fun," Regan said. "The best part of the event was having the opportunity to talk with parents of students and alumni. It was very rewarding and worthwhile to get back to the old Poly Royal. We went back to the basics with the education-

al display, and we'll grow from here."

Agri View Cochairperson David Neels, an agricultural education sophomore, said that because everything went well this year, he expects there will be an overwhelming amount of people wanting to help out next year.

He said that one of the most difficult aspects of organizing the event was departments and clubs getting schools to come to the event.

"Since this was the first year, many departments and clubs

were hesitant, but we worked with them to encourage schools to come for the educational displays," he said.

"It was really neat seeing all of the kids on Friday because they were having a great time," Neels said. "Teachers took the time to talk to them, and I think they really appreciated that."

Overall, Sabol said the event was a success.

"The School of Agriculture was out to prove we could have a quality, educational open-house, not a carnival," he said. "Mission accomplished."

AMBASSADORS

From page 1
dents are not aware of the opportunities available at schools such as Cal Poly, he said.

Killgore, an agribusiness junior, said ambassadors come from all different majors within the School of Agriculture.

"It's a strong and solid organization where each member contributes a lot of time and effort," Killgore said. "It is like the

cream of the crop from the School of Agriculture."

Killgore says the group is an experience in leadership and communication. Not only do they gain insight into agriculture, but ambassadors also meet industry leaders and develop friendships.

Killgore and Agriculture Ambassador Vice President Suzie Emery have been a part of the organization since it began three

years ago.

Emery, a business graduate student, says the future of Agriculture Ambassadors is promising. Already, the group has been credited with an increasing quantity and quality of applications.

Killgore says their presentations are energetic and professional. They usually begin with a questionnaire containing surpris-

ing facts about agriculture.

"It's mind-boggling — the response and interest we get back from students and teachers," Killgore said.

Right now, Agriculture Ambassadors is accepting applications for the 1991-92 academic year. Killgore said there will be about 20 openings.

To be considered for an ambassador position, students must

be enrolled in the School of Agriculture or have an agricultural career objective, and have a Cal Poly cumulative GPA of 2.5.

"We are looking for outgoing, professional people who can communicate well with their peers," Emery said.

Applications are available in the dean's office. An information meeting is set for April 30, at 7 p.m. in Ag Sciences, room 211.

POLY 'P'

From page 1
clubs on a rotating basis to climb the hill, pick up rubbish and color the "P" white with paint provided by the school.

But the "P" has not been white for more than a month now, leaving students to wonder if Pride of the "P" is doing its job. Denholm said the "P" has been neglected on purpose because it has taken the form of the American flag.

"You can't argue with God, motherhood and apple pie," Gerard said of the intentional neglect. He said, however, that the "P" was beginning to look shoddy and should be painted soon.

Denholm said the "P" was

scheduled to be painted last Saturday by Delta Sigma Phi fraternity but was canceled due to the rain. The group plans to paint the letter this weekend.

Gerard was not opposed to the idea of the "P" being altered by clubs on campus, as long as the clubs agreed to return the "P" to its original form. Gerard said that sort of option would need controls.

Gerard said the university should have some control over groups painting the "P". "Some creative individuals might come up with something offensive," he said.

Gerard said the cooperation of the student body in general is needed to keep the "P."
